OPEN JOINT STOCK COMPANY “COMPANY M.VIDEO”

STATEMENT OF MANAGEMENT’S RESPONSIBILITIES FOR THE PREPARATION AND APPROVAL OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2012

Management is responsible for the preparation of the consolidated financial statements that present fairly the financial position of OJSC “Company M.video” (the “Company”) and its subsidiaries (the “Group”) as of 31 December 2012, and the results of its operations, cash flows and changes in shareholders’ equity for the year then ended, in compliance with International Financial Reporting Standards (“IFRS”).

In preparing the consolidated financial statements, management is responsible for:

- Properly selecting and applying accounting policies;
- Presenting information, including accounting policies, in manner that provides relevant, reliable, comparable and understandable information;
- Providing additional disclosures when compliance with the specific requirements in IFRSs are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Group’s consolidated financial position and financial performance;
- Making an assessment of the Group’s ability to continue as a going concern.

Management is also responsible for:

- Designing, implementing and maintaining an effective and sound system of internal controls throughout the Group;
- Maintaining adequate accounting records that are sufficient to show and explain the Group’s transactions and disclose with reasonable accuracy at any time the consolidated financial position of the Group, and which enable them to ensure that the consolidated financial statements of the Group comply with IFRS;
- Maintaining statutory accounting records in compliance with local legislation and accounting standards of Russian Federation;
- Taking such steps as are reasonably available to them to safeguard the assets of the Group; and
- Detecting and preventing fraud and other irregularities.

The consolidated financial statements of the Group for the year ended 31 December 2012 were approved on 25 March 2013 on behalf of the Board of Directors by:

A. Tynkovan
President

C. Parks
Chief Financial Officer

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Open Joint Stock Company "Company M.video"

We have audited the accompanying consolidated financial statements of Open Joint Stock Company "Company M.video" and its subsidiaries (collectively – the "Group"), which comprise the consolidated statement of financial position as at 31 December 2012 and the consolidated statements of comprehensive income, changes in equity and cash flows for 2012, and notes comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the fair presentation of these consolidated financial statements based on our audit. We conducted our audit in accordance with Russian Federal Auditing Standards and International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to express an opinion on the fair presentation of these consolidated financial statements.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2012, and its consolidated financial performance and its consolidated results of cash flows for 2012 in accordance with International Financial Reporting Standards.

OPEN JOINT STOCK COMPANY “COMPANY M.VIDEO”

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2012 (In millions of Russian Rubles)

1. GENERAL INFORMATION

The consolidated financial statements of OJSC “Company M.video” (the “Company”) and subsidiaries (the “Group”) for the year ended 31 December 2012 were authorised for issue in accordance with a resolution of the Board of Directors on the 25 March 2013.

The Company and its subsidiaries (see the table below) are incorporated in the Russian Federation. The Company is registered at: 40/12, building 20, Nizhnaya Krasnoselskaya Street, Moscow, 105066, Russian Federation.

LLC “Company M.video” was incorporated on 3 December 2003. On 25 September 2006 the Company was reorganized from a Limited Liability Company to an Open Joint Stock Company. Following the initial public offering in November 2007, the Company’s ordinary shares were admitted to trading on RTS and MICEX stock exchanges (Moscow Exchange) in the Russian Federation.

The Group is the operator of a chain of consumer electronic outlets and online internet stores operating in the Russian Federation. The Group specializes in the sale of TV, audio, video, Hi-Fi, home appliances and digital equipment, as well as related services. The Group comprises a chain of owned and leased stores (296 stores as at 31 December 2012; 261 stores as at 31 December 2011) and online internet stores in Moscow and 16 other cities (one online internet store in Moscow as at 31 December 2011).

The accompanying consolidated financial statements include assets, liabilities and result of operations of the Company and its subsidiaries as at 31 December 2012 and 2011 (all of the below subsidiaries operate in the Russian Federation):

Name of subsidiary	Nature of business	Proportion of ownership interest and voting power held, % 2012	Proportion of ownership interest and voting power held, % 2011
LLC “M.video Management”	Retailing	100	100
LLC “Standard-Invest”	Real estate	-	100

In September 2012 the Company simplified the Group’s structure through reorganization of some of its subsidiaries by merging LLC “Standard-Invest” into LLC “M.video Management”. As the Company held 100% ownership interest in all entities both before and after the reorganization this merger did not have an impact on the consolidated financial statements of the Group.

Shareholders

As at 31 December 2012 and 2011 the registered shareholders of OJSC “Company M.video” and their respective ownership and voting interests were as follows:

	2012	2011
“Svece Limited”	57.7868%	67.7868%
“M.video Holding (Cyprus) Limited”	-	0.3344%
Various shareholders	42.2132%	31.8788%
Total	100%	100%

Ultimate Shareholders

“M.video Investment Ltd.” (BVI), a company incorporated in the British Virgin Islands controls 100% of the voting and ordinary shares of “M.video Holding (Cyprus) Limited” and “Svece Limited” (a company incorporated in Cyprus), and is the ultimate parent entity of the Company. Mr. Alexander Tynkovan, a citizen of the Russian Federation, has a controlling interest in “M.video Investment Ltd.” (BVI).

2. BASIS OF PREPARATION

Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

Basis of Accounting

The consolidated financial statements have been prepared on a historical cost basis except for the valuation of financial instruments in accordance with International Accounting Standard 39 “Financial Instruments: Recognition and Measurement” (“IAS 39”) and valuation of items of property, plant and equipment measured at fair value which was used as deemed cost of the property, plant and equipment as at the date of transition to IFRS. The Group transitioned to IFRS on 1 January 2006.

All companies within the Group maintain their accounting records in accordance with Russian Accounting Standards (“RAS”). RAS differ substantially from those standards generally accepted under IFRS. Accordingly, the consolidated financial statements, which have been prepared based on the Russian statutory accounting records, reflect those adjustments necessary for such consolidated financial statements to be presented in accordance with IFRS.

Functional and presentation currency – The consolidated financial statements are presented in Russian Rubles (“RUB”), which is the functional and presentation currency of each of the Group’s companies. Functional currency for each company of the Group has been determined as the currency of the primary economic environment in which the company operates.

Adoption of the new standards and interpretations

The accounting policies adopted are consistent with those of the previous financial year except as discussed below.

The Group has adopted the following new and amended International Accounting Standards (“IAS”), International Financial Reporting Standards and Interpretations issued by the International Accounting Standards Board (“IASB”) and the International Financial Reporting Interpretations Committee (“IFRIC”) of the IASB in these annual consolidated financial statements:

- Amendment to IFRS 1 “First – time Adoption of IFRSs” – Limited Exemption from Comparative IFRS 7 Disclosures for First-time Adopters;
- IAS 24 “Related Party Disclosures” (Revised);
- Amendment to IAS 32 “Financial Instruments: Presentation” – Classification of Rights Issues;
- Amendment to IFRIC 14 “Prepayments of Minimum Funding Requirements”;
- IFRIC 19 “Extinguishing Financial Liabilities with Equity Instruments”;
- Improvements to IFRSs (May 2010).

The adoption of these new and revised standards and interpretations has not had an impact on consolidated financial statements of the Group for the year ended 31 December 2012.

2. BASIS OF PREPARATION (CONTINUED)

Changes in the presentation of the Group’s consolidated financial statements

In 2012 the Group has changed presentation of its consolidated financial statements with respect to classification of certain expenses in the consolidated statement of comprehensive income.

Specifically, starting 1 January 2012 the Group classifies transportation expenses associated with moving merchandise inventories from central distribution warehouses to the Group’s retail stores as part of Cost of Sales. In prior periods the Group reported these expenses within Selling, General and Administrative expenses. The Group has made this change in classification in order to enhance fair presentation of expenses incurred in getting merchandise inventories to the points of sales.

Reclassifications

In the year ended 31 December 2012 the Group changed presentation of certain items of assets and expenses as against the year ended 31 December 2011 in order to enhance fair presentation of the annual consolidated financial statements. With this regard the Group made the following reclassifications to the prior period’s amounts to conform to the presentation of the current reporting period:

	<u>As previously reported</u>	<u>Reclassifi- cation</u>	<u>After reclassifi- cation</u>	<u>Comments</u>
Consolidated Statement of Comprehensive Income for the year ended 31 December 2011

3. SIGNIFICANT ACCOUNTING POLICIES

Basis of consolidation – The consolidated financial statements comprise the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The financial statements of the subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

All intra-group transactions, balances, income and expenses and profits and losses resulting from intra-group transactions are eliminated in full on consolidation.

Operating segments – Segment reporting is presented on the basis of management’s perspective and relates to the parts of the Group that are defined as operating segments. Operating segments are identified on the basis of internal reports to the Group’s chief operating decision maker (“CODM”). These internal reports are prepared on the same basis as these consolidated financial statements.

Based on the current management structure the Group has identified one operating segment – the sale of consumer electronics through its retail and internet stores.

Going concern – These consolidated financial statements are prepared on the going concern basis.

Foreign currencies – The individual financial statements of each Group’s entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency).

In preparing the financial statements of the individual entities, transactions in currencies other than the entity’s functional currency (foreign currencies) are recorded at the rates of exchange prevailing at the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are translated at the rates prevailing at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the exchange rate prevailing on the date when the most recent fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in the consolidated statement of comprehensive income in the period in which they arise. Exchange differences arising on loans and borrowings are reported as part of finance cost, while exchange differences related to operating items are included into other operating income and expenses.

Property, plant and equipment – Property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Deemed cost of the items of property, plant and equipment existing as at 1 January 2006, the date of transition to IFRS, was determined on the basis of fair values estimated by independent appraisers as allowed by the provisions of IFRS 1. Fair value of properties was determined with reference to market prices, while fair value of the other items, including the Group’s trade equipment, was predominantly based on the estimates of depreciated replacement costs. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Major replacements or modernizations of property, plant and equipment are capitalized and depreciated over their estimated useful lives. All other repair and maintenance expenditure is recognized in the consolidated statement of comprehensive income during the financial period in which it is incurred.

OPEN JOINT STOCK COMPANY “COMPANY M.VIDEO”

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2012 (In millions of Russian Rubles)

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Depreciation is charged so as to write off the cost or valuation of assets over their estimated useful lives, using the straight line method, on the following bases:

Buildings	20-30 years
Leasehold improvements	2-7 years
Trade equipment	3-5 years
Security equipment	3 years
Other fixed assets	3-5 years

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

The Group recognises in the carrying amount of an item of property, plant and equipment the cost of replacing part of such item when the cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the Group and the cost of the item can be measured reliably. The assets being replaced are written off immediately. All other costs are recognized in the consolidated statement of comprehensive income as an expense as incurred.

For leasehold improvements the depreciation period includes the period when the Group has the possibility to extend the period of the lease, taking into account the legal provisions relating to lease terms, and its intention to seek a long-term presence in the various retail locations in which it operates. This is relevant for leases of retail space which, on a portfolio basis, have a history of successful renewal. All other leasehold improvements are depreciated over the shorter of useful life or the related lease term.

Trade equipment is depreciated over the estimated useful life specified above unless there is a plan to fully renovate the store prior to reaching the predetermined estimated useful life. In this situation, the net book value of trade equipment will be depreciated over the remaining estimated useful life being the period of time up to the planned renovation works.

The assets' residual value and useful lives are reviewed and adjusted, if appropriate, at each balance sheet date. Where there are indicators that an asset's or cash generating unit's carrying amount is greater than its estimated recoverable amount, it is written down to its recoverable amount.

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the consolidated statement of comprehensive income.

Construction in progress comprises the cost of equipment in the process of installation and other costs directly relating to the construction of property, plant and equipment including an appropriate allocation of directly attributable variable overheads that are incurred in construction. Depreciation of these assets, on the same basis as for other property assets, commences when the assets are ready for their intended use.

Advance payments for construction in progress are shown separately in the consolidated statement of financial position.

Intangible assets – Intangible assets acquired separately are reported at cost less accumulated amortization and accumulated impairment losses. Amortization is charged on a straight-line basis over estimated useful lives of these intangible assets. The estimated useful life and amortization method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The estimated useful lives per class of intangible assets are as follows:

Software licenses and development	1-10 years
Trademarks	5-10 years

OPEN JOINT STOCK COMPANY “COMPANY M.VIDEO”

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2012 (In millions of Russian Rubles)

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Internally-generated intangible assets – An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognized if, and only if, all of the following have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- The intention to complete the intangible asset and use or sell it;
- The ability to use or sell the intangible asset;
- How the intangible asset will generate probable future economic benefits;
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- The ability to measure reliably the expenditure attributable to the intangible asset during its development.

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

The amount initially recognized for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognized, development expenditure is recognized in the consolidated statement of comprehensive income in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Impairment of tangible and intangible assets – At each balance sheet date the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less cost to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset. In determining fair value less cost to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share price for publicly traded subsidiaries or other fair value indicators.

For tangible and intangible assets the CGU is deemed to be each group of stores located in one city. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGUs, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be identified.

Impairment test is performed by the Group annually for those intangible assets that are not yet available for use at the year-end by comparing their carrying amount with the recoverable amount calculated as discussed above. If the carrying amount of such assets does not yet include all the cash outflows to be incurred before they are ready for use, the estimate of future cash outflow includes an estimate of any further cash outflow that is expected to be incurred before the asset is ready for use.

Income Tax – Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences, and deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are not recognized for taxable temporary differences associated with investments in subsidiaries as the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to be reversed in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applied in the period in which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Current and deferred income tax for the period

Current and deferred income tax are recognized as an expense or income in the consolidated statement of comprehensive income, except when they relate to items credited or debited directly to equity (in which case the tax is also recognized directly in equity) or where they arise from the initial accounting for a business combination. In the case of a business combination, the tax effect is taken into account in calculating goodwill or in determining the excess of the acquirer’s interest in the net fair value of the acquiree’s identifiable assets, liabilities and contingent liabilities over cost.

Fair value – The fair value of investments that are actively traded in organized financial markets is determined by reference to quoted market bid prices at the close of business on the balance sheet date. For investment where there is no active market, fair value is determined using valuation techniques. Such techniques include using recent arm’s length market transactions; reference to the current market value of another instrument, which is substantially the same; discounted cash flow analysis or other valuation models.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial assets – Investments are recognized and derecognized on a trade date, where the purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value, net of transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

Financial assets that the Group holds on its consolidated statement of financial position at 31 December 2012 are classified into the following specified categories: financial assets as ‘at fair value through profit or loss’ (“FVTPL”) and ‘loans and receivables’. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period.

Income is recognized on an effective interest basis for debt instruments other than those financial assets designated as at FVTPL.

Financial assets as at FVTPL

Financial assets are classified as at FVTPL where the financial asset is either held for trading or it is designated as at FVTPL.

A financial asset is classified as held for trading if:

- It has been acquired principally for the purpose of selling in the near future; or
- It is a part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- It is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- The financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group’s documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- It forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Financial assets as at FVTPL are stated at fair value, with any resultant gain or loss recognized in the consolidated statement of comprehensive income. The net gain or loss recognized in the consolidated statement of comprehensive income incorporates any dividend or interest earned on the financial asset. Fair value is determined in the manner described above.

Loans and receivables

Trade receivables, loans, and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as ‘loans and receivables’. Loans and receivables are measured at amortized cost using the effective interest method less any impairment losses and bad debts.

Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets

Financial assets, other than those as at FVTPL, are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted. For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade and other accounts receivable where the carrying amount is reduced through the use of an allowance account. When trade and other accounts receivable are uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in the consolidated statement of comprehensive income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through the consolidated statement of comprehensive income to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire; or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay.

If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities and equity instruments issued by the Group

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Equity instrument

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recorded as the proceeds received, net of direct issue costs.

Financial guarantee contract liabilities

Financial guarantee contract liabilities are measured initially at their fair values and are subsequently measured at the higher of:

- The amount of the obligation under the contract, as determined in accordance with IAS 37 “Provisions, Contingent Liabilities and Contingent Assets”; and
- The amount initially recognized less, where appropriate, cumulative amortization recognized in accordance with the revenue recognition policies set out below.

Financial liabilities

Financial liabilities are classified as either financial liabilities as at FVTPL or other financial liabilities.

Financial liabilities as at FVTPL

Financial liabilities are classified as at FVTPL where the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- It has been incurred principally for the purpose of repurchasing in the near future; or
- It is a part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- It is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- It forms part of a contract containing one or more embedded derivatives, and IAS 39 permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Financial liabilities as at FVTPL are stated at fair value, with any resultant gain or loss recognized in profit or loss. The net gain or loss recognized in the consolidated statement of comprehensive income incorporates any interest paid on the financial liability. Fair value is determined in the manner described above.

Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire.

Share-based payments – Equity-settled share based payments to employees are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in Note 30.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest. At each balance sheet date, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in the consolidated statement of comprehensive income over the remaining vesting period with a corresponding adjustment to retained earnings.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Where the terms of an equity-settled transaction award are modified, the minimum expense recognized is the expense as if the terms had not been modified, if the original terms of the award are met. An additional expense is recognized for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately in the consolidated statement of comprehensive income. This includes any award where non-vesting conditions within the control of either the entity or the employee are not met. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph. All cancellations of equity-settled transaction awards are treated equally.

Derivative financial instruments – In course of its business the Group from time to time enters into derivative financial instruments to manage its exposure to foreign exchange rate risk mostly through foreign exchange forward contracts. The Group does not use hedge accounting for these derivatives. As a result, such derivative financial instruments are treated as other financial assets and liabilities as at FVTPL. Gains and losses recognized for the changes in fair value of forward contracts are presented as part of finance costs or other operating expenses of the Group depending on whether its use is related to a financial item or an operating item.

The fair value of forward exchange contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles.

Costs of an equity transaction – The transaction costs of an equity transaction are accounted for as a deduction from equity (net of any related income tax benefit) to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

The amount of transaction costs accounted for as a deduction from equity in the period is disclosed separately. The related amount of income taxes recognized directly in equity is included in the aggregate amount of current and deferred income tax credited or charged to equity.

Value added tax – Value added tax (“VAT”) related to sales is payable to tax authorities on the earliest of (a) cash received from customers in advance or (b) transfer of the goods or rendering services to customers. Input VAT is generally recoverable against sales VAT upon receipt of the VAT invoice. Input VAT on construction in progress can be reclaimed on receipt of VAT invoices for the particular stage of work performed or, if the construction in progress project cannot be broken down into stages, on receipt of VAT invoices upon completion of the contracted work.

VAT is generally allowed to be settled on a net basis. VAT related to sales and purchases which have not been settled at the balance sheet date is recognized in the consolidated statement of financial position on a gross basis and disclosed separately as an asset and liability. Where a provision has been made for the impairment of receivables, the impairment loss is recorded for the gross amount of the debtor, including VAT.

At each balance sheet date the Group reviews outstanding balance of input VAT for recoverability and creates impairment provision for the amounts which recoverability is doubtful.

Inventories – Inventories are recorded at the lower of average cost or net realizable value. In-bound freight related costs from the suppliers incurred to deliver inventories to the Group’s central distribution warehouse are included as part of the net cost of merchandise inventories. Certain supplier bonuses that are not reimbursement of specific, incremental and identifiable costs to promote a supplier’s products are also included in the cost of inventory. Other costs associated with storing and transporting merchandise inventories from the central distribution warehouse to the retail stores are expensed as incurred and included either in “Cost of sales” (costs of transporting merchandise from central distribution warehouses to the retail stores) or in “Selling, general and administrative expenses” (all other costs).

Net realizable value is the estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale.

The Group provides for estimated inventory losses between physical inventory counts on the basis of percentages of sales. The provision is adjusted annually based on historical results to reflect the estimated trend of the actual physical inventory count results.

Cash and cash equivalents – Cash and cash equivalents comprise cash at banks, in transit and on hand in stores and short-term deposits with an original maturity of three months or less, and credit card payments received within 24 hours of the next working day.

Borrowing costs – The borrowing costs are capitalized by the Group as part of the cost of the asset when the costs are directly attributable to the acquisition, construction of a qualifying asset. The Group defines qualifying assets as leasehold improvements and other assets acquired in connection with the new store openings which generally take three months or longer to become operational. Other borrowing costs are expensed as incurred.

Provisions – Provisions are recognized when the Group has a present obligation as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Warranties

Warranties are generally covered by the brand owner of supplied goods directly or through their authorised agents in the Russian Federation.

When a supplier is unable to offer warranty services for their products in Russia, the Group makes a provision for warranty costs. These costs are recognized at the date of sale of the relevant products at management's best estimate of the expenditure required to settle the Group's obligations.

Revenue recognition – Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates, discounts and VAT. Inter-company revenue is eliminated. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods

Revenue from the sale of goods is recognized when all the following conditions are satisfied:

- The Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be reliably measured;
- It is probable that the economic benefits associated with the transaction will flow to the Group; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

The Group recognizes revenue for store sales when the customer receives the product and pays for the merchandise. For online sales the Group recognizes revenue at the time the customer receives the product. The recognized revenue includes credit card fees payable for the transaction. Such costs are presented in operating expenses.

The Group operates a loyalty points program “M.video Bonus”, which allows customers to accumulate points when they purchase goods in the Group’s retail stores. The points can then be redeemed as a payment for merchandise, subject to a minimum number of points being obtained. Proceeds from sale to members of the loyalty program are allocated between the loyalty points and the other components of the sale. The consideration allocated to the loyalty points is measured by reference to their fair value, i.e. the amount for which the loyalty points could be sold separately. This amount is deferred and recognized as revenue when the points are redeemed. Expected breakage is recognized as revenue at the time of initial sale as it is excluded from the amount allocated to loyalty points.

Revenue from services

Revenue from services is recognized in the period in which the services have been rendered and the following conditions are satisfied:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Group;
- The stage of completion of the transaction at the balance sheet date can be measured reliably; and
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Additional service agreements

Revenue from the sale of additional service agreements (“ASA”) is recognized on an 'as earned' basis with the unearned portion (if any) spread over the remaining term of the contracts to reflect the costs the Group expects to incur in performance of its contractual obligations. Costs directly associated with the sale of ASA, such as sales bonuses paid to shop assistants, repair costs, as well as commission paid to other parties to provide full or partial coverage of the Group's obligations under existing ASA are recognized in the consolidated statement of comprehensive income on the same basis as related revenue.

The revenue is recognized in full when no further costs are expected to be incurred. Specifically, where a third party assumes substantially all of the Group’s obligations under ASA for a consideration that is based on a fixed proportion of fees charged to customers, the revenue is recognized in full.

The revenue is deferred and recognized ratably over the term of the service contract when the Group has responsibility for fulfilling obligations under these contracts, in these cases the related costs are recognized as incurred.

Revenue from the sale of ASA is reported within retail revenue.

Agents

The Group recognizes as revenue any sales performed as an agent at net amounts. Such fees include sales of telephone service contracts, service and installation fees.

Gift cards

The Group sells gift cards to its customers in its retail stores and through its website. The gift cards have an expiration date and are required to be used during specified periods of time. The Group recognizes income from gift cards at the earlier date when: (i) the gift card is redeemed by the customer; or (ii) when the gift cards expire.

Interest income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable. Interest income is included in the net finance cost in the consolidated statement of comprehensive income.

Supplier bonuses – The Group receives bonuses from suppliers. All supplier bonuses are treated as volume allowances unless they are subject to a separate agreement which is specific, incremental and identifiable. Supplier bonuses which are earned by achieving certain volume purchases are recorded when it is reasonably assured the Group will reach these volumes. Supplier bonuses based on volume are recorded as a reduction of the carrying cost of the inventory to which they relate. Supplier bonuses provided as a reimbursement of specific, incremental and identifiable costs incurred to promote a supplier’s products are included as an expense (or asset cost) reduction when the cost is incurred.

Leases – The Group has not entered into any finance leases, although it does have a significant number of operating leases.

Operating lease payments are recognized as an expense on a straight line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred. The impact of lease escalation clauses is recognized in expenses in the period in which they are activated.

Any benefits received from the landlord as an incentive to enter into an operating lease are spread over the lease term on a straight line basis. Sublease income and lease expenses are presented on the net basis.

Pre-opening expenses – Expenses incurred in the process of opening new stores which do not meet capitalization criteria under IAS 16 “Property, plant and equipment” are expensed as incurred. Such expenses include rent, utilities and other operating expenses.

Employee benefits – Remuneration to employees in respect of services rendered during the reporting period is recognized as an expense in that reporting period. The Group contributes to the Russian Federation state pension, medical and social insurance on behalf of all its current employees (a defined contribution plan) by paying social security contributions (“SSC”). The Group’s only obligation is to pay contributions to the Fund as they fall due. As such, the Group has no legal obligation to pay and does not guarantee any future benefits to its Russian employees. Any related expenses are recognized in the consolidated statement of comprehensive income as they become due. Contribution for each employee varies from 0% to 20% depending on the annual gross remuneration of each employee. The Group does not operate any employer sponsored pension plans.

Dividends – Dividends are recognized as a liability in the period in which they have been declared by the shareholders in a general meeting and become legally payable. Dividends are disclosed when they are proposed before the reporting date or proposed or declared after the reporting date but before the financial statements are authorised for issue.

Treasury shares – If the Group reacquires its own equity instruments, those instruments (“treasury shares”) are recognized as a deduction to equity at cost, being the consideration paid to reacquire the shares. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group’s own equity instruments. Such treasury shares may be acquired and held by the Company or by other subsidiaries of the Group.

4. STANDARDS AND INTERPRETATIONS IN ISSUE NOT YET ADOPTED

The following new or revised standards and interpretations issued by IASB and IFRIC have been published at the date of authorization of the Group’s consolidated financial statements for the year ended 31 December 2012, but are not yet effective:

- IFRS 9 “Financial Instruments” – Classification and Measurement; Additions to IFRS 9 for Financial Liability Accounting;
- IFRS 10 “Consolidated Financial Statements”;
- IFRS 11 “Joint Arrangements”;
- IFRS 12 “Disclosure of Interests in Other Entities”;
- IFRS 13 “Fair Value Measurement”;
- IAS 19 “Employee Benefits” (as revised in 2011);
- IAS 27 “Separate Financial Statements” (as revised in 2011);
- IAS 28 “Investments in Associates and Joint Ventures” (as revised in 2011);
- Amendments to IFRS 10 “Consolidated Financial Statements”, IFRS 11 “Joint Arrangements” and IFRS 12 “Disclosure of Interests in Other Entities”;
- Amendments “Investment Entities” to IFRS 10 “Consolidated Financial Statements”, IFRS 12 “Disclosure of Interests in Other Entities” and IAS 27 “Separate Financial Statements (as revised in 2011)”;
- Amendments to IFRS 1 “First-time Adoption of International Financial Reporting Standards” for Government Grants;
- Amendments to IAS 1 “Presentation of Financial Statements” – Presentation of Items of Other Comprehensive Income;
- Amendments “Offsetting of Financial assets and Financial Liabilities” to IAS 32 “Financial instruments: Presentation” and amendments “Disclosures Offsetting of Financial assets and Financial Liabilities” to IFRS 7 “Financial instruments: Disclosures”;
- Annual Improvements to IFRSs: 2009-2011 Cycle.

IFRS 9 “Financial Instruments” – Classification and Measurement; Additions to IFRS 9 for Financial Liability Accounting

IFRS 9 was amended to defer the mandatory effective date of both the 2009 and 2010 versions of IFRS 9 to annual periods beginning on or after 1 January 2015. The amendments continue to permit early application. This amendment was also referred to IFRS 7 “Financial Instruments: Disclosures” in the part of disclosure requirements related to amendment to IFRS 9 and its application to the financial accounting and reporting for financial instruments.

The standard provides a classification of financial assets which determines whether a financial asset is measured at amortized cost or at fair value, based on how an entity manages its financial assets and the contractual cash flow characteristics of the financial assets.

The amendments to the standard issued in 2010 contain the requirements for classification and measurement of financial liabilities. Guidance on derecognition of financial instruments and related implementation guidance from IAS 39 “Financial Instruments: Recognition and Measurement” has also been incorporated into IFRS 9. The key differences, relating to presentation and measurement of financial liabilities as compared to IAS 39 are the presentation of the effects of changes in the fair value attributable to a liability’s credit risk; and the elimination of the cost for derivative liabilities to be settled by delivery of unquoted equity instruments. The Group is currently assessing the impact of the new standard on its consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2012 (In millions of Russian Rubles)

4. STANDARDS AND INTERPRETATIONS IN ISSUE NOT YET ADOPTED (CONTINUED)

IFRS 10 “Consolidated Financial Statements”

IFRS 10 replaces the portion of IAS 27 “Consolidated and Separate Financial Statements” that addresses the accounting for consolidated financial statements. It also includes the issues raised in SIC-12 “Consolidated – Special Purpose Entities”. IFRS 10 establishes a single control model that applies to all entities including special purpose entities. The changes introduced by IFRS 10 will require management to exercise significant judgment to determine which entities are controlled, and therefore, are required to be consolidated by a parent, compared with the requirements that were in IAS 27. The standard becomes effective for annual periods beginning on or after 1 January 2013. The Group is currently assessing the impact of the new standard on its consolidated financial statements.

IFRS 11 “Joint Arrangements”

IFRS 11 replaces IAS 31 “Interest in Joint Ventures” and SIC-13 “Jointly-controlled Entities – Non-monetary Contributions by Venturers”. IFRS 11 removes the option to account for jointly controlled entities (JCEs) using proportionate consolidation. Instead, JCEs that meet a definition of a joint venture must be accounted for using the equity method. The standard becomes effective for annual periods beginning on or after 1 January 2013. The amendments are expected to have no impact on the Group’s consolidated financial statements.

IFRS 12 “Disclosure of Interests in Other Entities”

IFRS 12 includes all of the disclosures that were previously in IAS 27 related to consolidated financial statements, as well as all of the disclosures that were previously included in IAS 31 and IAS 28. These disclosures related to an entity’s interest in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are also required. This standard becomes effective for annual periods beginning on or after 1 January 2013. The Group is currently assessing the impact of the new standard on its consolidated financial statements.

IFRS 13 “Fair Values Measurement”

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provide guidance on how to measure fair value under IFRS when fair value is required or permitted. This standard becomes effective for annual periods beginning on or after 1 January 2013. The Group is currently assessing the impact that this standard will have on the consolidated financial position and performance.

IAS 19 “Employee benefits” (as revised in 2011)

The IASB has issued numerous amendments to IAS 19. These range from fundamental changes such as removing the corridor mechanism and the concept of expected returns on plan assets to simple clarifications and re-wording. The elimination of the “corridor approach” permitted under the previous version of IAS 19 and provision for accelerated recognition of past service cost are the most important new requirements. The amendments require all actuarial gains and losses be recognized immediately through other comprehensive income in order for the net pension asset or liability recognized in the consolidated statement of financial position to reflect the full value of the plan deficit or surplus. The amendments will not have an impact on the Group’s consolidated financial statements because of absence of the transactions to which they relate.

IAS 27 “Separate Financial Statements” (as revised in 2011)

As a consequence of the new IFRS 10 and IFRS 12, what remains of IAS 27 is limited to accounting for subsidiaries, jointly controlled entities, and associates in separate financial statements. The Group does not present separate financial statements. The amendment becomes effective for annual periods beginning on or after 1 January 2013. The amendments are expected to have no impact on the Group’s consolidated financial statements.

IAS 28 “Investments in Associates and Joint Ventures” (as revised in 2011)

As a consequence of the new IFRS 11 and IFRS 12, IAS 28 has been renamed IAS 28 “Investments in Associates and Joint Ventures”, and describes the application of the equity method to investments in joint ventures in addition to associates. The amendment becomes effective for annual periods beginning on or after 1 January 2013. The amendments are expected to have no impact on the Group’s consolidated financial statements.

Amendments to IFRS 10 “Consolidated Financial Statements”, IFRS 11 “Joint Arrangements” and IFRS 12 “Disclosure of Interests in Other Entities”

In June 2012 the IASB issued the amendments to IFRS 10, IFRS 11 and IFRS 12 to clarify certain transitional guidances on the application of these IFRSs for the first time. The effective of the amendments is the same as the effective date of IFRS 10, IFRS 11 and IFRS 12, i.e. 1 January 2013 for calendar-year entities. The amendments are expected to have no impact on the Group’s consolidated financial statements.

Amendments “Investment Entities” to IFRS 10 “Consolidated Financial Statements”, IFRS 12 “Disclosure of Interests in Other Entities” and IAS 27 “Separate Financial Statements (as revised in 2011)”

In October 2012 the IASB issued the amendments to IFRS 10 which introduced an exception to consolidating subsidiaries for any investment entity, except where the subsidiaries provide services that relate to the investment entity’s investment activities. Under these amendments, an investment entity is required to measure its interests in subsidiaries at fair value through profit or loss. In addition, certain criteria have to be met for qualification as an investment entity. Consequential amendments to IFRS 12 and IFRS 27 (as revised in 2011) have been made to introduce new disclosure requirements for investment entities. The amendments to IFRS 10, IFRS 12 and IAS 27 are effective for annual periods beginning on or after 1 January 2014, with early application permitted. The amendments are expected to have no impact on the Group’s consolidated financial statements.

Amendments to IFRS 1 “First-time Adoption of International Financial Reporting Standards” for Government Grants;

On 13 March 2012 the IASB issued Government Loans Amendments to IFRS 1 providing relief to first-time adopters of IFRSs by amending IFRS 1 to permit prospective application of IAS 39 “Financial Instruments: Recognition and Measurement” or, when applied, IFRS 9 “Financial Instruments” and paragraph 10A of IAS 20 “Accounting for Government Grants and Disclosure of Government Assistance” to government loans outstanding at the date of transition to IFRSs. The amendments are effective for annual periods beginning on or after 1 January 2013, with early application permitted. The amendments will not have an impact on the Group’s consolidated financial statements because of absence of the transactions to which they relate.

Amendments to IAS 1 “Presentation of Financial Statements” – Presentation of Items of Other Comprehensive Income

The amendments to IAS 1 change the grouping of items presented in other comprehensive income. Items that could be reclassified (or “recycled”) to profit or loss at a future point in time (for example, upon derecognition or measurement) would be presented separately from items that will never be reclassified. The amendment affects presentation only and has there no impact on the Group’s financial position or performance. The amendment becomes effective for annual period beginning on or after 1 July 2012.

4. STANDARDS AND INTERPRETATIONS IN ISSUE NOT YET ADOPTED (CONTINUED)

Amendments “Offsetting of Financial assets and Financial Liabilities” to IAS 32 “Financial instruments: Presentation” and amendments “Disclosures Offsetting of Financial assets and Financial Liabilities” to IFRS 7 “Financial instruments: Disclosures”

In December 2011, the IASB amended IFRS 7 “Financial instruments: Disclosures” and IAS 32 “Financial instrument: presentation”. Amendments clarify assets and liabilities offsetting rules and introduce new related disclosure requirements. The amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014. The new disclosure requirements in IFRS 7 are effective for annual periods beginning on or after January 1, 2013. The Group is currently assessing the impact of these amendment on its consolidated financial statements and do not expect the amendments to have a material impact on the Group's consolidated statement of financial position and results of operations.

Annual Improvements to IFRSs 2009-2011 Cycle

On 17 May 2012 the IASB issued Annual Improvements to IFRSs: 2009-2011 Cycle, incorporating amendments to five IFRSs (IFRS 1 “First-time adoption of International Financial Reporting Standards”, IAS 1 “Presentation of Financial Statements”, IAS 16 “Property, Plant and Equipment”, IAS 32 “Financial Instruments: Presentation”, IAS 34 “Interim Financial Reporting”). This is the fourth collection of amendments issued under the annual improvement process, which is designed to make necessary, but non-urgent, amendments to IFRSs. The amendments must be applied retrospectively and are effective for annual periods beginning on or after 1 January 2013, with earlier application permitted. Entities are permitted to early adopt any individual amendment within the Annual Improvements to IFRSs: 2009-2011 Cycle without early adopting all other amendments. The Group does not expect any significant impact on its consolidated financial statements which can be caused by these Improvements to IFRSs.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION OF UNCERTAINTY

In the application of the Group's accounting policies, which have been described in Note 3, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant, including, but not limited to, the uncertainties and ambiguities of the Russian legal and taxation systems and the difficulties in securing contractual rights as defined in contracts. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Significant estimates and assumptions

Inventory valuation

Management reviews the inventory balances to determine if inventories can be sold at amounts greater than or equal to their carrying amounts plus costs to sell. This review includes identification of slow moving inventories, obsolete inventories and partially or fully damaged inventories. The identification process includes historical performance of the inventory, current operational plans for the inventory as well as industry and customer specific trends. Damaged stock is either provided for or written off depending on the extent of damage. Management makes an allowance for any items considered to be obsolete. The allowance represents the difference between the cost of inventory and its estimated net realizable value.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION OF UNCERTAINTY (CONTINUED)

The net realizable value allowance is calculated using the following methodology:

- Stock held for resale – comparison of expected selling price versus the carrying value on a stock keeping unit basis;
- Damaged goods – examination of historical data relating to discounts associated with damaged goods and comparison to book value at the balance sheet date;
- Stock held at service centers – an allowance is applied based on management’s estimate of the carrying value of the inventory and based on historical data on sales of respective inventories;
- Additional allowance is accrued for if there is actual evidence of a decline in selling prices after the end of the reporting period to the extent that such decline confirms conditions existing at the end of the period.

If actual results differ from management’s expectations with respect to the selling of inventories at amounts equal to or less than their carrying amounts, management would be required to adjust the carrying amount of inventories.

Tax and customs provisions and contingencies

The Group is subject to various taxes arising in the Russian Federation. The majority of its merchandise is imported into Russian Federation and is therefore subject to the Russian customs regulations. Significant judgment is required in determining the provision for income taxes and other taxes. The Group recognizes liabilities for anticipated tax issues based on estimates of whether it is probable that additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the amount of tax and tax provision in the period in which such determination is made.

The Group obtains various types of supplier bonuses. Current Russian tax legislation is unclear if the amount of VAT refund relating to goods purchased should be decreased by the amount of VAT on such bonuses. The Group believes that its interpretation of the current tax legislation is consistent with industry practice, is appropriate and no additional tax liabilities arise in respect of supplier bonuses. On 29 March 2012 the Supreme Arbitration Court of the Russian Federation published a Decision of its Presidium, which provides some additional guidance on the Court’s interpretation of the Russian tax legislation on supplier bonuses. Further Group position on this matter will depend on the court practice and amendments of the legislation related to bonuses from suppliers, if and when it may occur.

Recovery of deferred tax assets

Deferred tax assets are recognized for deductible temporary differences as management believes there will be sufficient future taxable profits to utilize those temporary differences.

Share-based payments

The cost of equity-settled transactions with employees (under Long-term incentive plan hereinafter “LTIP”) is based on the Group’s estimate of the number of equity instruments that will eventually vest and other estimates outlined in Note 30.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION OF UNCERTAINTY (CONTINUED)

Useful life of property, plant and equipment

Trade equipment is depreciated over the estimated useful life specified in Note 3 above. The estimated useful life is adjusted when there is a plan to fully renovate the store in the near future, in which case carrying value of related trade equipment is depreciated over the period of time up to the planned renovation work.

Revenue attributed to loyalty program points

The Group estimates the fair value of points awarded under “M.video Bonus” loyalty program by applying “bonus ruble conversion rate” so that part of consideration allocated to the award credits represents their purchase capacity. Management also makes assumption about expected redemption rates. Points issued under the program expire with the passage of time; therefore such estimates are subject to significant uncertainty as at balance sheet date.

Allowance for Doubtful Accounts

Provision for impairment is based on the historical data related to collectability of accounts receivable and solvency analysis of the most significant debtors. If the financial condition of customers were to deteriorate, actual write-offs might be higher than expected. More details are provided in Notes 8 and 10.

Critical judgments in applying the Group’s accounting policies

Recognition of revenue from sale of ASA and associated costs

Revenue earned from the sale of ASA is recognized on an 'as earned' basis with the unearned portion (if any) spread over the remaining term of the contracts to reflect the costs the Group expects to incur in performance of its contractual obligations.

With respect to sale of ASA until 1 October 2011 the Group operated under agreement concluded with a related party services center which assumed substantially all of the Group's obligations under all of the existing and future ASA for a consideration based on a fixed proportion of fees charged to customers. The fixed commission paid to a related party service center to provide coverage for the Group's obligations under the ASA was recognized immediately as part of “Cost of sales”. Other direct costs associated with the sale of ASA prior to 1 October 2011, such as sales bonuses paid to shop assistants were disclosed as part of “Selling, general and administrative expenses”. All obligations under ASA sold prior to 1 October 2011 remain with the related party service center until they expire.

On 1 October 2011 the Group changed its ASA-related practices in such a way that going forward the related party service center will no longer be assuming substantially all of the Group’s obligations under the ASA for a fixed consideration. Consequently, for all ASA certificates that are being sold since 1 October the Group recognizes revenue ratably over the term of ASA certificates and the related costs are recognized as incurred.

Supplier bonuses

The Group receives various types of bonuses from suppliers in the form of volume discounts and promotional, advertising fees. Management has concluded that substantially all supplier bonuses received or receivable by the Group should be treated as volume based, effectively reducing the cost of goods purchased from the suppliers, rather than a reimbursement of specific costs incurred by the Group.

Share capital

As at 31 December 2012 and 2011 the Company had the following number of authorised, issued and outstanding ordinary shares:

	<u>Outstanding ordinary shares</u>	<u>Issued ordinary shares</u>	<u>Authorised ordinary shares</u>
Balance as at 31 December 2012 and 31 December 2011	177,068,227	179,768,227	209,768,227

Each share has par value of 10 RUB per share. During 2012 and 2011 there were no changes in the number of authorised and issued ordinary shares of the Company. All issued ordinary shares were fully paid.

Additional paid-in capital

Additional paid-in capital consists of share premium which is the excess between proceeds from issuance of 30,000,000 additional ordinary shares issued at 1 November 2007 and their par value, less share issuance costs and related current and deferred income tax amounts.

Treasury shares

In September 2010 following the approval by the Board of Directors, the Group purchased 2,700,000 issued ordinary shares of the Company to be subsequently offered to the members of the LTIP Series 3 program in order to service the resulting subscription rights, for total cash consideration of 588. All 2,700,000 shares were held as treasury shares at cost as at 31 December 2010, 2011 and 2012.

Dividends declared

On 22 June 2012 the Annual General Meeting approved dividends of 5.80 RUB per share in respect of 2011. On 5 December 2012 the Extraordinary General Shareholders Meeting approved dividends of 30.00 RUB per share in respect of 9 months 2012.

Dividends attributable to the treasury shares were eliminated in full for the purpose of these consolidated financial statements. After the approval, dividends payable to the holders of outstanding ordinary shares of the Company were recognized as a reduction of shareholders' equity in these consolidated financial statements in the total amount 6,348.

16. INCOME TAX

The Group's income tax expense for the years ended 31 December 2012 and 2011 was as follows:

	<u>2012</u>	<u>2011</u>
Current tax expense	(2,094)	(1,439)
Deferred tax benefit	<u>681</u>	<u>175</u>
Total income tax expense	<u>(1,413)</u>	<u>(1,264)</u>

The tax effect on the major temporary differences that give rise to the deferred tax assets and liabilities as at 31 December 2012 and 2011 is presented below:

	<u>2012</u>	<u>2011</u>
Deferred tax assets		
Supplier bonuses allocated to inventories	828	572
Deferred revenue	473	239
Accrued expenses	499	226
Allowance for obsolete and slow-moving inventories	165	201
Difference in depreciable value of property, plant and equipment	-	200
Salary-related accruals	161	133
Allowance for doubtful debts	31	58
Other items	<u>53</u>	<u>37</u>
Total	<u>2,210</u>	<u>1,666</u>
Deferred tax liabilities		
Difference in depreciable value of property, plant and equipment and intangible assets	179	310
Other items	<u>1</u>	<u>7</u>
Total	<u>180</u>	<u>317</u>

As at 31 December 2012 and 2011 the Group measured deferred tax assets and deferred tax liabilities using tax rate of 20%, which is the rate expected to be applied in the period in which the asset is realized or the liability is settled.

The taxation charge for the year is different from that which would be obtained by applying the statutory income tax rate to the profit before income tax expense. Below is a reconciliation of theoretical income tax expense at the statutory rate of 20% effective for 2012 and 2011 to the actual expense recorded in the Group's consolidated statement of comprehensive income:

	<u>2012</u>	<u>2011</u>
Profit before income tax expense	5,554	4,638
Theoretical income tax expense at the statutory rate of 20%	<u>(1,111)</u>	<u>(928)</u>
<i>Adjustments due to:</i>		
Losses due to inventory shortages	(41)	(45)

16. INCOME TAX (CONTINUED)

As at 31 December 2012 there were no taxable temporary differences related to investments in subsidiaries for which deferred tax liabilities might have been recognized if the Group hadn't been in a position to control the timing of the reversal of these temporary differences (31 December 2011: nil). No taxable temporary differences exist due to changes in Tax Code of the Russian Federation effective 1 January 2011. According to these changes, distributions of a subsidiary's earnings are subject to 0% rate of withholding tax in case a holding entity has owned 50% or more shares of its subsidiary during a calendar year preceding the date of a decision to distribute subsidiaries' earnings.

22. PROVISIONS

Provisions as at 31 December 2012 and 2011 consisted of the following:

	Non-current		Current	
	2012	2011	2012	2011
Warranty provision – in respect of ASA (i)	22	95	73	196
Provision for goods return	-	-	108	76
Warranty provision – repair of goods (ii)	6	5	14	10
Total	28	100	195	282

- (i) The warranty provision in respect of ASA represents management’s best estimate of the future outflow of economic benefits that will be required under the Group’s 2, 3 and 5 year ASA certificates sold prior to 1 October 2011. A Group entity sells the ASA directly to customers; however, before 1 October 2011 a back-to-back agreement was in effect between the Group entity and a related party which provided for transfer the obligations under the ASA from the Group to the related party. For this reason an equal corresponding non-current (Note 8) and current (Note 14) asset has been recognized by the Group, and disclosed within other assets. The estimate has been made on the basis of historical warranty trends and may vary as a result of events affecting product quality and expected cost of services.
- (ii) The warranty provision in respect of repair of goods represents management’s best estimate of the future outflow of economic benefits that will be required to service goods sold for which there is no supplier service center in the Russian Federation.

The movement in provisions during the years ended 31 December 2012 and 2011 is as follows:

	Warranty – ASA	Warranty – Repair of goods	Provision for goods return

30. SHARE-BASED PAYMENTS

Employee share option plan

The Group had one equity-settled share option scheme in operation during the year ended 31 December 2012. During the previous year the Group had two share option schemes in operation, one of which was fully settled in April 2011.

Long-term incentive plan Series 2 (“LTIP 2”)

Under LTIP 2, which was adopted on 1 April 2008, 46 members of the management team became members of the plan and 756,000 of the shares designated for the LTIP were committed. All shares designated for LTIP 2 vested as at 1 April 2011.

In accordance with the provisions of the plan each employee share option allows the recipient to purchase one ordinary share of OJSC “Company M.video” from M.video Investment Ltd. (BVI). The proceeds from the purchase is payable to the existing shareholder. No amounts are paid or payable by the recipient on receipt of the option.

The options carry neither rights to dividends nor voting rights. Employees must be employed at the vesting date to exercise his or her right unless the Board of Directors waives this condition. The number of options granted per employee is determined by the President and approved by the Board of Directors. Participants are able to exercise their options within 30 days since the vesting date by paying 10 RUB per share to the operator of the program.

Long-term incentive plan Series 3 (“LTIP 3”)

On 9 December 2009 the Board of Directors approved the adoption of Series 3 of the LTIP for selected members of the Group’s management team. 56 positions were enrolled in the plan and 3,170,000 of the shares were designated for LTIP 3. The shares will be granted by the Group to the participants of the plan at the appropriate vesting dates provided that the participants are employed to exercise his or her right unless the Board of Directors waives this condition. Consideration given to this non-market vesting condition requires the management to estimate the number of shares that will eventually vest and to adjust accordingly the number of shares included in the measurement of the transaction amount. Based on existed accumulated data on staff turnover the management best estimate of the number of shares eventually expected to vest is 2,615,010 (2011: 2,670,000).

Summary of the arrangements in existence as at 31 December 2012 and 2011

The following table contains details of the arrangements that were in existence as at 31 December 2012 and 2011:

Fair value of share options

The weighted average fair values of the share options granted under LTIP 2 and LTIP 3 and outstanding as at 31 December 2012 and 2011 are as follows (in RUB):

Option series	31 December 2012	31 December 2011
LTIP 2	-	170.39
LTIP 3	118.48	118.48

Options were priced using the Black-Scholes pricing model. Where relevant, the model has reflected management’s best estimate of the future volatility of the Company’s share price, expected dividend yield, risk-free interest rates and expected staff turnover. Management draws upon a variety of external sources to aid in the determination of the appropriate data to use in such situations.

Inputs into the model	LTIP 2 share options vesting on 1 April 2011	LTIP 3 share options vesting on 1 April 2013	LTIP 3 share options vesting on 1 April 2015
Grant date share price, RUB	177.45	122.27	122.27
Exercise price, RUB	10	-	-
Expected volatility	26.85%	123.55%	123.55%
Option life (years)	3	3	5
Dividend yield	0%	0%	0%
Risk-free interest rate	10%	7.5%	7.5%

The expected volatility was determined based on the ending weekly share price for the period from 1 November 2007 to 1 April 2008 – for LTIP 2 and from 1 November 2007 to 9 December 2009 – for LTIP 3. The expected volatility is equal to the historical volatility due to the brief history of trading activity and lack of comparable industry data.

Movements in share options during the period

The following reconciles the outstanding share options granted under the employee share plan at the beginning and end of the years ended 31 December 2012 and 2011:

	LTIP 2		LTIP 3

33. COMMITMENTS AND CONTINGENCIES

Operating environment

The Group sells products that are sensitive to changes in general economic conditions that impact consumer spending. Future economic conditions and other factors, including consumer confidence, employment levels, interest rates, consumer debt levels and availability of consumer credit could reduce consumer spending or change consumer purchasing habits. A general slowdown in the Russian economy or in the global economy, or an uncertain economic outlook, could adversely affect consumer spending habits and the Group's operating results.

The Russian economy is vulnerable to market downturns and economic slowdowns elsewhere in the world. The global financial system continues to exhibit signs of deep stress and many economies around the world are experiencing lesser growth than in prior years or no growth. Additionally there is increased uncertainty about the creditworthiness of some sovereign states in the Eurozone and financial institutions with exposure to the sovereign debt of such states. In 2012 the Russian Government continues to take measures to support the economy in order to overcome the consequences of the global financial crisis. Consequently, there continues to be uncertainty regarding further economic growth, access to capital and cost of capital for the Group and its counterparties, which could affect the Group's financial position, results of operations and business prospects. Although any further deterioration in the areas described above could negatively affect the Group's results and financial position in a manner not currently determinable, the management believes it is taking appropriate measures to support the sustainability of the Group's business in the current circumstances.

Russian Federation tax and regulatory environment

The government of the Russian Federation continues to reform the business and commercial infrastructure in its transition to a market economy. As a result, laws and regulations affecting business continue to change rapidly. These changes are characterized by unclear wording which leads to different interpretations and arbitrary application by the authorities. Management's interpretation of such legislation as applied to the activity of the Group may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities are taking a more assertive position in their interpretation of the legislation and assessments and as a result, it is possible that transactions and activities that have not been challenged in the past may be challenged. It is therefore possible that significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to tax audit by the authorities in respect of taxes for three calendar years preceding the year of tax audit. Under certain circumstances reviews may cover longer periods. Management believes that it has accrued for all taxes that are applicable. Where uncertainty exists, the Group has accrued tax liabilities as management's best estimate of the probable outflow of resources which will be required to settle such liabilities. Management believes that it has provided adequately for tax liabilities based on its interpretations of tax legislation. However, the relevant authorities may have differing interpretations, and the effects could be significant.

During 2012 the Group neither recognized nor reversed any amount of tax provision for income and other taxes (2011: no provision recognized or reversed). Therefore as at 31 December 2012 the balance of tax provision remained unchanged and amounted to 133.

The Group has identified other possible tax contingencies in respect of issues unrelated to customs (as discussed below) for the three-year period ended 31 December 2012. Management has estimated that possible exposure in relation to such tax risks, if they were to materialize, would not exceed twice the amount of the Group's profit before income tax expense.

33. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Customs

During the years ended 31 December 2012 and 2011, the Group purchased a significant portion of its foreign manufactured goods on the territory of the Russian Federation from Russian legal entities, including Russian wholesalers or resellers, which may or may not have imported the goods into Russia directly. As the Group was not involved in clearing customs for the goods purchased on the territory of Russia, management cannot be certain that the entities which imported the goods into Russia were in full compliance with the applicable regulations of the Russian customs code.

As described above in *Russian Federation tax and regulatory environment* section, the relevant authorities may take a more assertive position in their interpretation of the applicable laws. Under Russian law a company in possession of goods that were imported with proven violations of the customs law may be subject to significant administrative or civil penalties and/or confiscation of the goods, if it was involved in, aware of, or should have known that violation of the customs code were occurring. To date, the Group has not been subject to any notification of violations of the customs code.

Management believes that the Group entities were acting in compliance with all applicable tax and legal requirements in respect of imported products, were not involved, not aware and could not be expected to know of any significant violations of the applicable customs code by the Russian wholesalers or resellers. Accordingly, management did not recognize any provisions in respect of such contingencies in these consolidated financial statements and determined that with current limitations in access to customs clearance documents it is not practicable to estimate the likely potential financial effect, if any, of such contingent liabilities.

License Agreements

As at 31 December 2012, the Group had a total commitment of approximately 2.5 - 2.8 million EUR per annum (or 100.6 – 111.1 million RUB per annum using exchange rate published on the Central Bank website of 40.2286 RUB/ EUR as at 31 December 2012) for technical support services with respect to existing SAP licenses and software during the period from 2012 to 2016 (31 December 2011: approximately 1.5 – 1.7 million EUR per annum, or 63.3 – 71 million RUB per annum using exchange rate published on the Central Bank website of 41.6714 RUB/ EUR as at 31 December 2011). The Group uses SAP software for finance, supply chain and human resources functions.

Litigation

In the normal course of business, the Group is subject to proceedings, lawsuits, and other claims. While such matters are subject to other uncertainties, and outcomes are not predictable with assurance, the management of the Group believes that any financial impact arising from these matters would not be material to its financial position or annual operating results.

Environmental matters

The enforcement of environmental regulation in the Russian Federation is evolving and the enforcement posture of government authorities is continually being reconsidered. The Group periodically evaluates its environmental obligations. In the current enforcement climate under existing legislation, management believes that there are no significant liabilities for environmental matters.

Financial guarantees

In the normal course of its operating activity the Group from time-to-time enters into financial guarantee contracts with banks. Under these contracts the banks provide guarantees in favour of the Group's suppliers and the Group may be required to pay under those contracts only if it fails to make timely payments to its suppliers. As at 31 December 2012 the Group entered into such guarantee contracts for the total amount of 710 (2011: 1,226). The Group has pledged its inventories with the carrying amount of 9 (2011: 759) as collateral under these guarantee contracts.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Generally the Group's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to raise finance for the Group's operations. The Group has trade and other receivables and cash and short-term deposits that arrive directly from its operations.

The main risks arising from the Group's financial instruments are foreign currency risk, interest rate risk, credit risk and liquidity risk.

The Group's senior management oversees the management of these risks. The Group's senior management provides assurance to the Group's Board of Directors that the Group's financial risk-taking activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies. The Board of Directors reviews and agrees policies for managing each of these risks which are summarized below.

Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximizing the return to shareholders through the optimization of the debt and equity balance. No changes were made in objectives, policies or processes during the years ended 31 December 2012 and 2011.

The capital structure of the Group consists of cash and cash equivalents (Note 12) and equity attributable to equity holders of the parent, comprising issued capital (less treasury shares), additional paid in capital and retained earnings.

The primary objective of the Group's capital management program is to maximize shareholder value while minimizing the risks associated with the loan portfolio. The consumer electronics business is a cyclical business and as such requires short-term fluctuations in capital to purchase goods to satisfy the seasonal demand. The Group uses a combination of short-term loans and supplier credit terms to meet the seasonal capital needs. The store expansion program adds to the capital needs as the capital and pre-opening costs associated with the new stores puts additional pressure on the Group's financial resources. While the Group has not established any formal policies regarding debt to equity proportions the Group reviews its capital needs periodically to determine actions to balance its overall capital structure through shareholders' capital contributions or new share issues, return of capital to shareholders as well as the issue of new debt or the redemption of existing debt.

Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognized, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 3 to the consolidated financial statements.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Foreign currency risk management

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group has transactional currency exposures arise from lease payments tied-in to currencies other than functional currency. The Group uses forward exchange contracts to eliminate the currency exposures. The forward exchange contracts are in the same currency as an item denominated in the foreign currency. The Group does not designate forward contracts as hedges for accounting purposes.

The Group's forward contracts are the only monetary items that give rise to foreign currency risk. The following table details the forward foreign currency contracts outstanding at the reporting date:

	Contract value in mln foreign currency		Contract value in mln Russian RUB		Fair value	
	2012	2011	2012	2011	2012	2011
Buy EUR	4	9	177	406	(2)	(20)
Buy USD	36	63	1,134	2,068	(23)	2

Foreign currency sensitivity analysis

As mentioned above, the Group is mainly exposed to the currencies of the United States of America (USD) and the European zone (EUR).

The following table demonstrates the sensitivity to reasonably possible changes in the US dollar and euro, with all other variables held constant, of the Group's profit before tax due to changes in the fair value of monetary assets and liabilities. Effect on profit includes the result of changes in the fair value of forward contracts. Although the derivatives have not been designated in a hedge relationship, they give rise to gains or losses on settlement.

	USD		EUR	
	Changes in exchange rate, %	Effect on profit before income tax	Changes in exchange rate, %	Effect on profit before income tax
2012	+10%	113	+5%	9
	-10%	(113)	-5%	(9)

	USD		EUR	
	Changes in exchange rate, %	Effect on profit before income tax	Changes in exchange rate, %	Effect on profit before income tax
2011	+10%	207	+5%	20
	-10%	(207)	-5%	(20)

Interest rate risk management

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Management believes that this risk is not significant because as at 31 December 2012 the Group does not have any borrowings or other financial liabilities bearing floating interest rates (31 December 2011: nil).

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

Credit risk management

Credit risk refers to the risk that counterparty may default on its contractual obligations resulting in financial loss to the Group. Financial assets which are potentially subject the Group to credit risk consist primarily of trade and other receivables as well as cash in current and deposit accounts with banks and other financial institutions.

The Group trades only with recognized, creditworthy third parties which are registered in the Russian Federation. The policy is that all customers which are granted credit terms have a history of purchases from the Group employ individuals who are known to the Group and can demonstrate they have the financial resources to cover their limits. The Group also requires these customers to provide certain documents such as incorporation documents and financial statements.

The Group's sales and credit concentration is not significant since neither revenue nor trade accounts receivable from any individual customer exceeds 1% of the Group's consolidated revenues and trade accounts receivable, respectively. Any defaults in payments or a material reduction in purchases made by any individual customer will not have significant negative impact on the Group's financial condition, results of its operations and liquidity.

The credit risk on liquid funds (see the table below) is managed by the Group's treasury. The management believes that credit risk on investments of surplus funds is limited as the counterparties are financial institutions with high credit ratings assigned by international credit rating agencies.

The table below shows the balances that the Group has with 4 of its major counterparties as at the balance sheet date:

Counterparty	Currency	Rating	Carrying amount	
			2012	2011
Gazprombank	RUB	Baa3	743	4,700
Sberbank	RUB	Prime-2	244	-
Metallinvestbank	RUB	Baa1	-	1,500
Credit Europe Bank	RUB	Ba3	450	1,500
Credit Bank of Moscow	RUB	B1/NP	2,040	1,495
Total			3,477	9,195

The carrying amount of financial assets recorded in the consolidated financial statements, which is net of impairment losses, represents the Group's maximum exposure to credit risk. There were no other concentrations of credit risk as at 31 December 2012 (31 December 2011: nil).

Liquidity risk management

The Group's treasury monitors the risk of a shortage of funds using a recurring liquidity planning tool. This tool considers the maturity of both its financial investments and financial assets (e.g. accounts receivable, other financial assets) and projected cash flows from operations.

The Group's objective is to maintain a continuity of funding and flexibility through the use of bank overdrafts and bank loans. Each year the Group analyses its funding needs and anticipated cash flows, so that it can determine its funding obligations. The seasonality of the business, the store expansion plan, capitalized projects and the anticipated working capital requirements form the basis of the evaluation. When necessary the Group uses long-term instruments (loans and borrowings) to cover its base liquidity needs. The Group uses short-term loans and bank overdrafts to cover seasonality needs. Every quarter the Group updates its liquidity needs and secures facilities with several banks to ensure that the Group has a sufficient amount of approved undrawn borrowing facilities.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

As at 31 December 2012 the Group had obtained uncommitted standby borrowing facilities in the total amount of 3,000 (31 December 2011: 9,500).

The table below summarizes the maturity profile of the Group's financial liabilities as at 31 December 2012 and 2011 based on contractual undiscounted payments:

As at 31 December 2012	Less than 3 months	Total
Trade accounts payable	35,586	35,586
Other accounts payable and accrued expenses	3,680	3,690
Total	39,266	39,276

As at 31 December 2011	Less than 3 months	Total
Trade accounts payable	32,673	32,673
Other accounts payable and accrued expenses	2,338	2,354
Total	35,011	35,027

Fair value of financial instruments

Management consider that the carrying amounts of financial assets and financial liabilities reflected in the Group's consolidated statement of financial position as at 31 December 2012 and 2011 approximate their fair values.

35. SUBSEQUENT EVENTS

After the balance sheet date no events occurred which require disclosure in the consolidated financial statements.
