While many market players have had to contend with financial concerns and have been closing stores we continue to open new stores and use our financial strength to capture market share”.

He noted: "When we look at the second quarter results we should remember that we are comparing to a boom period and a sales period that included higher than normal sales due to the Euro 2008 where the Russian team made the semi finals".

Alexander Tynkovan also stated: "Our strong balance sheet and low leverage send a very good signal to our suppliers and business partners. We will continue with our winning strategy and strengthen our market position while remaining financially strong."
